Jim Washburne, GLOBE Soil Moisture Scientist and SALSA '97 Riparian Campaign veteran, maintains a webpage, "Links to Western Water Resource Issues," which may be of interest to you.

Note that Jim is needing URL links to Mexican institutions. Perhaps those of you with IMADES and ORSTOM, or elsewhere, could help Jim with this.

If you have any comments, questions, or suggestions for Jim, send them to his email address shown at the bottom of his attached message. Thanks.

I maintain a page of links called "Links to Western Water Resource Issues". I will try to keep it up to date and add most of the sites recommended to me. Please feel free to share this URL with others:

<http://www.hwr.arizona.edu/globe/h2oissues.html>

One thing the page lacks are any links to Mexican institutions or groups working with water so I especially desire those.

Also note the links to "Land-surface Hydrology Data" from the top of the page.

----- Cheers -----
